DIY water pipe frost protection system

Energy efficient Switches on at 5°C

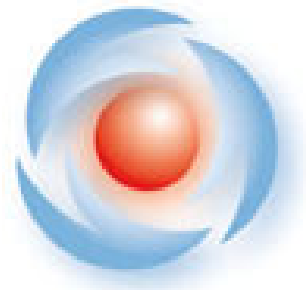

Contact Amanda on [01484 851 450](tel:01484851450) for help with your requirements

Protect your water pipes from the frost

Effective plug-in electric heater cable

Easy install for plastic and metal pipes

Economical to use (low running)

- a) Measure your pipe and select the kit to suit.**
- b) Ensure you have an adequate electrical supply**
- c) If outdoors ensure your electrical socket is weatherproof**

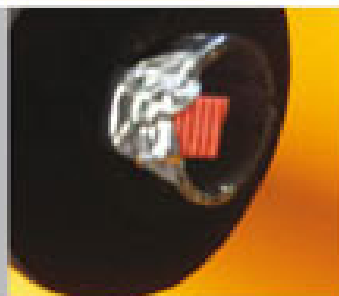

Run heating cable straight on the pipe and apply adhesive tape along its length

Apply Thermal insulation and seal down the joints with tape provided

Place the caution labels on the outer surface to ensure a safe installation

Plug in to your supply, switch on and you're protected for the winter!

We recommend that all heaters are protected with an RCCD socket.
